August is National Immunization Awareness Month!

The Corner Health Center provides all required school immunizations for our patients (and their children), and in addition the COVID vaccine, monkey pox vaccine, gardasil vaccine, and more. We strive to make sure all of our patients are immunized!

If you would like information or to schedule your next appointment, please call 734.714.2236.

Quote from Markia, Clinic Manager

I want to emphasize the crucial role that immunizations play in safeguarding public health. Immunizations protect not only the individuals who receive them but also the broader community by reducing the spread of infectious diseases. Vaccines have been instrumental in eradicating or controlling many serious illnesses. By ensuring that everyone, especially children, receives their recommended vaccinations, we at The Corner Health Center are building a healthier future for all. Immunizations are a safe, effective, and necessary measure to prevent outbreaks, protect those who cannot be vaccinated, and save lives. Let's work together to promote vaccination and keep our community strong and healthy!

August is National Breastfeeding Month

For National Breastfeeding Month, be sure to make an appointment with our **Maternal Infant Health Program (MIHP)**! Our MIHP team provides **lactation education & support** during pregnancy and throughout the family's breastfeeding journey. Our aim is to help families reach their feeding goals!
